Note to the Reader

The texts included in the Proceedings of the round table Mathematics Libraries in Europe have been assembled from the record made on July 9, 1992. These texts do not constitute an exact transcription of the tape, but are rather highlights of the discussions and presentations. In particular, we have changed the order of a few sections and have tried to arrange them by theme.

The round table was made possible by a grant and the encouragement of the organizers of the First European Congress of Mathematics and of the Sous-Direktion des Bibliothèques.

In particular, we wish to thank the following persons who were willing to participate in the round table:
